

LEADERSHIP AGILITY

As our world turns upside down with the COVID-19 pandemic, most companies are reacting rather than responding. Organizations are forced to innovate and become more efficient, in adjusting to new ways of working. But in times of uncertainty, business agility provides stability - a way to manage change and respond productively.

One of the biggest challenges is leadership style. As a leader, you need to model behavior exemplifying the agile mindset. This program prepares the leaders to adopt an agile transformation to reap the following long term outcomes.

Objectives

-  To learn and apply learning agility and agile principles in working environment
-  To develop a big-picture understanding of agile – independent of which agile method is used
-  To develop an agile mindset and establish a common frame of reference
-  Understand the when and why of agile thinking

Highlighted Topics

-  **1 Introduction to leadership agility**
-  **2 Characteristic of learning agility**
-  **3 Agile principles in workplace**
